The average production time for this smokerman is 4 month. Sometimes it can take up to 6 month because most figures will be individually crafted.

This smokerman is primarily for decorational purposes. The small incense cones do not generate enough smoke to get this smokerman "smoking". For some of the extra large smokers there are electrical smoke generators available.

Because of the size of the item it can not be shipped with regular delivery methods outside Germany. Please contact us if you are interested to get the shipping cost calculated for your country.
